

# Cerner - Student 2nd Role

How to Login to your 2nd Cerner Role

Your 1st Cerner role is linked to your Tenet username. Your 2<sup>nd</sup> Cerner role is an adhoc account, it's not linked to your Tenet username. Example:

Name	Username	Position
Saldana, Samantha	SAMANTHA.SALDANA - 1st Cerner role	Clinical Informaticist eRx
Saldana RN, Samantha	SAMANTHA.SALDANA1 - 2nd Cerner role	RN Float SPC R3

Follow these steps to access your 2<sup>nd</sup> Cerner role

1. Login to Cerner, Enter your **Tenet** username and password

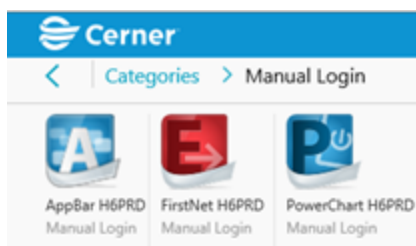

The image shows the Cerner login interface. It features the Cerner logo on the left. To the right, there are three input fields: 'User name:' with 'tenet username' entered, 'Password:' with 'tenet password' entered, and 'Domain:' with 'TENETHEALTH' selected from a dropdown menu. A blue 'Log On' button is positioned at the bottom right of the form.

2. Click the Manual Login Folder

3. Click the Application for your Second role

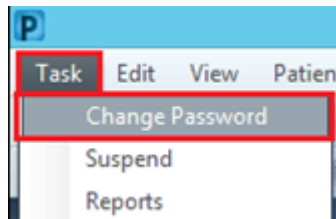

4. A login window appears, Enter your 2<sup>nd</sup> role username and password

- The first time you login, enter the temporary password provided to you, you will be prompted to create a new password
- Tip: Use the same password you use for your Tenet password

- The 2<sup>nd</sup> Cerner role account is not like your Tenet account, it will not ask you to change your password every 90 days – It will stay the same until you change it in Cerner.
- Tip: Update your 2<sup>nd</sup> Cerner role password when you change your Tenet password

- To change your password:
  1. Login to your 2<sup>nd</sup> account
  2. In the Toolbar (upper left side of screen), Click on Task, Click on Change Password
  3. Update your password

If you forgot your password - Call the Hospital's Clinical Informaticist.
